USE YOUR SENSES

ABC — GUIDELINE

N⁰ e

BLAQ chair meets no.e

WOULD YOU LIKE TO SURPRISE YOUR GUESTS WITH A WELCOME MESSAGE INCLUDING A PHOTO? OR WOULD YOU RATHER LIKE TO PRESENT ONE OF YOUR IMPRESSIVE REFERENCES? REGARDLESS OF WHETHER YOU USE NO.E AS AN ELECTRONIC SEAT NUMBERING SYSTEM OR TO ADDRESS YOUR GUESTS INDIVIDUALLY – THE HIGH-RESOLUTION DISPLAY CAPTIVATES THE BEHOLDER.

MAKE USE OF THE POSSIBILITIES

#leadtheworkflowrevolution

A —

like active display area.
With its size of 48,55 mm x
23,71 mm the display offers
optimum legibility with high
contrast and leaves a long
lasting impression.

A ——

like advertising revenues.
By transmitting company
logos to your system, you
might generate new sources
of income. Why not?

C —

like connection. Your digital network connects guests, information, infrastructure as well as your company with each other and thus facilitates a perfectly coordinated event experience.

C —

like content. Regardless of the type of content you would like to display, feel free to do so – either text, seat number, company logo or photo.

E �—

like energy supply. Are you afraid of additional service fees, since only the manufacturing company may change the built-in special purpose batteries? No need for that with no.e. Due to the use of commercial coin cell batteries you benefit and you are completely independent at the same time.

H ——

like high-resolution display.
The high-resolution electronic
paper display presents your
world of events and conferences
in brilliant quality. Besides that,
it has been a successful, reliable
component within retail for
years.

L—

like longevity. Changing batteries? If so, only once every 5 years, please. Because no.e's display does not consume any energy if you are not actively transmitting content

0 —

like one time only. One time only you need to assign an identification number to each individual chair. After that, you simply transmit the requested content to each display with the help of your user interface. Even if you are not on site. A substantial saving of time and manpower no other system can offer.

P —

like platform-independent web application. Via your individual SSL encoded user interface, a responsive website, which can be operated intuitively, enables you to transmit any content from all standard devices, whether desktop or mobile.

Q—

like quantity. Would you like to transmit content to a single chair or 5,000 chairs? Well, it does not matter, since no.e can cope with any quantity of seating accommodations within your space.

R ——

like retrofit. Your existing individual seating furniture items can be retrofitted with our no.e system without any problems.

R —

like return on investment. Would you like to know the exact duration until amortization? In co-operation with you, we take a close look at the impressive cost-effectiveness of the no.e system.

S —

like SaaS. no.e is designed as a cloud-based "Software as a Service" solution and thus ensures efficient performance as well as cost-effectiveness. Moreover, it offers scalability, remote access to services and automatic updates.

S ——

like security. By monitoring each display's individual battery indicator, you avoid unpleasant surprises. Because nothing could be more embarrassing than display failures right before or during an event.

S ⎯

like surprise guests. You need to be able to change the names of your guests at the last minute. With a single click you are able to react instantly to changes of your guest list within the user interface of no.e. Simply update name, photo or welcome message wherever you are.
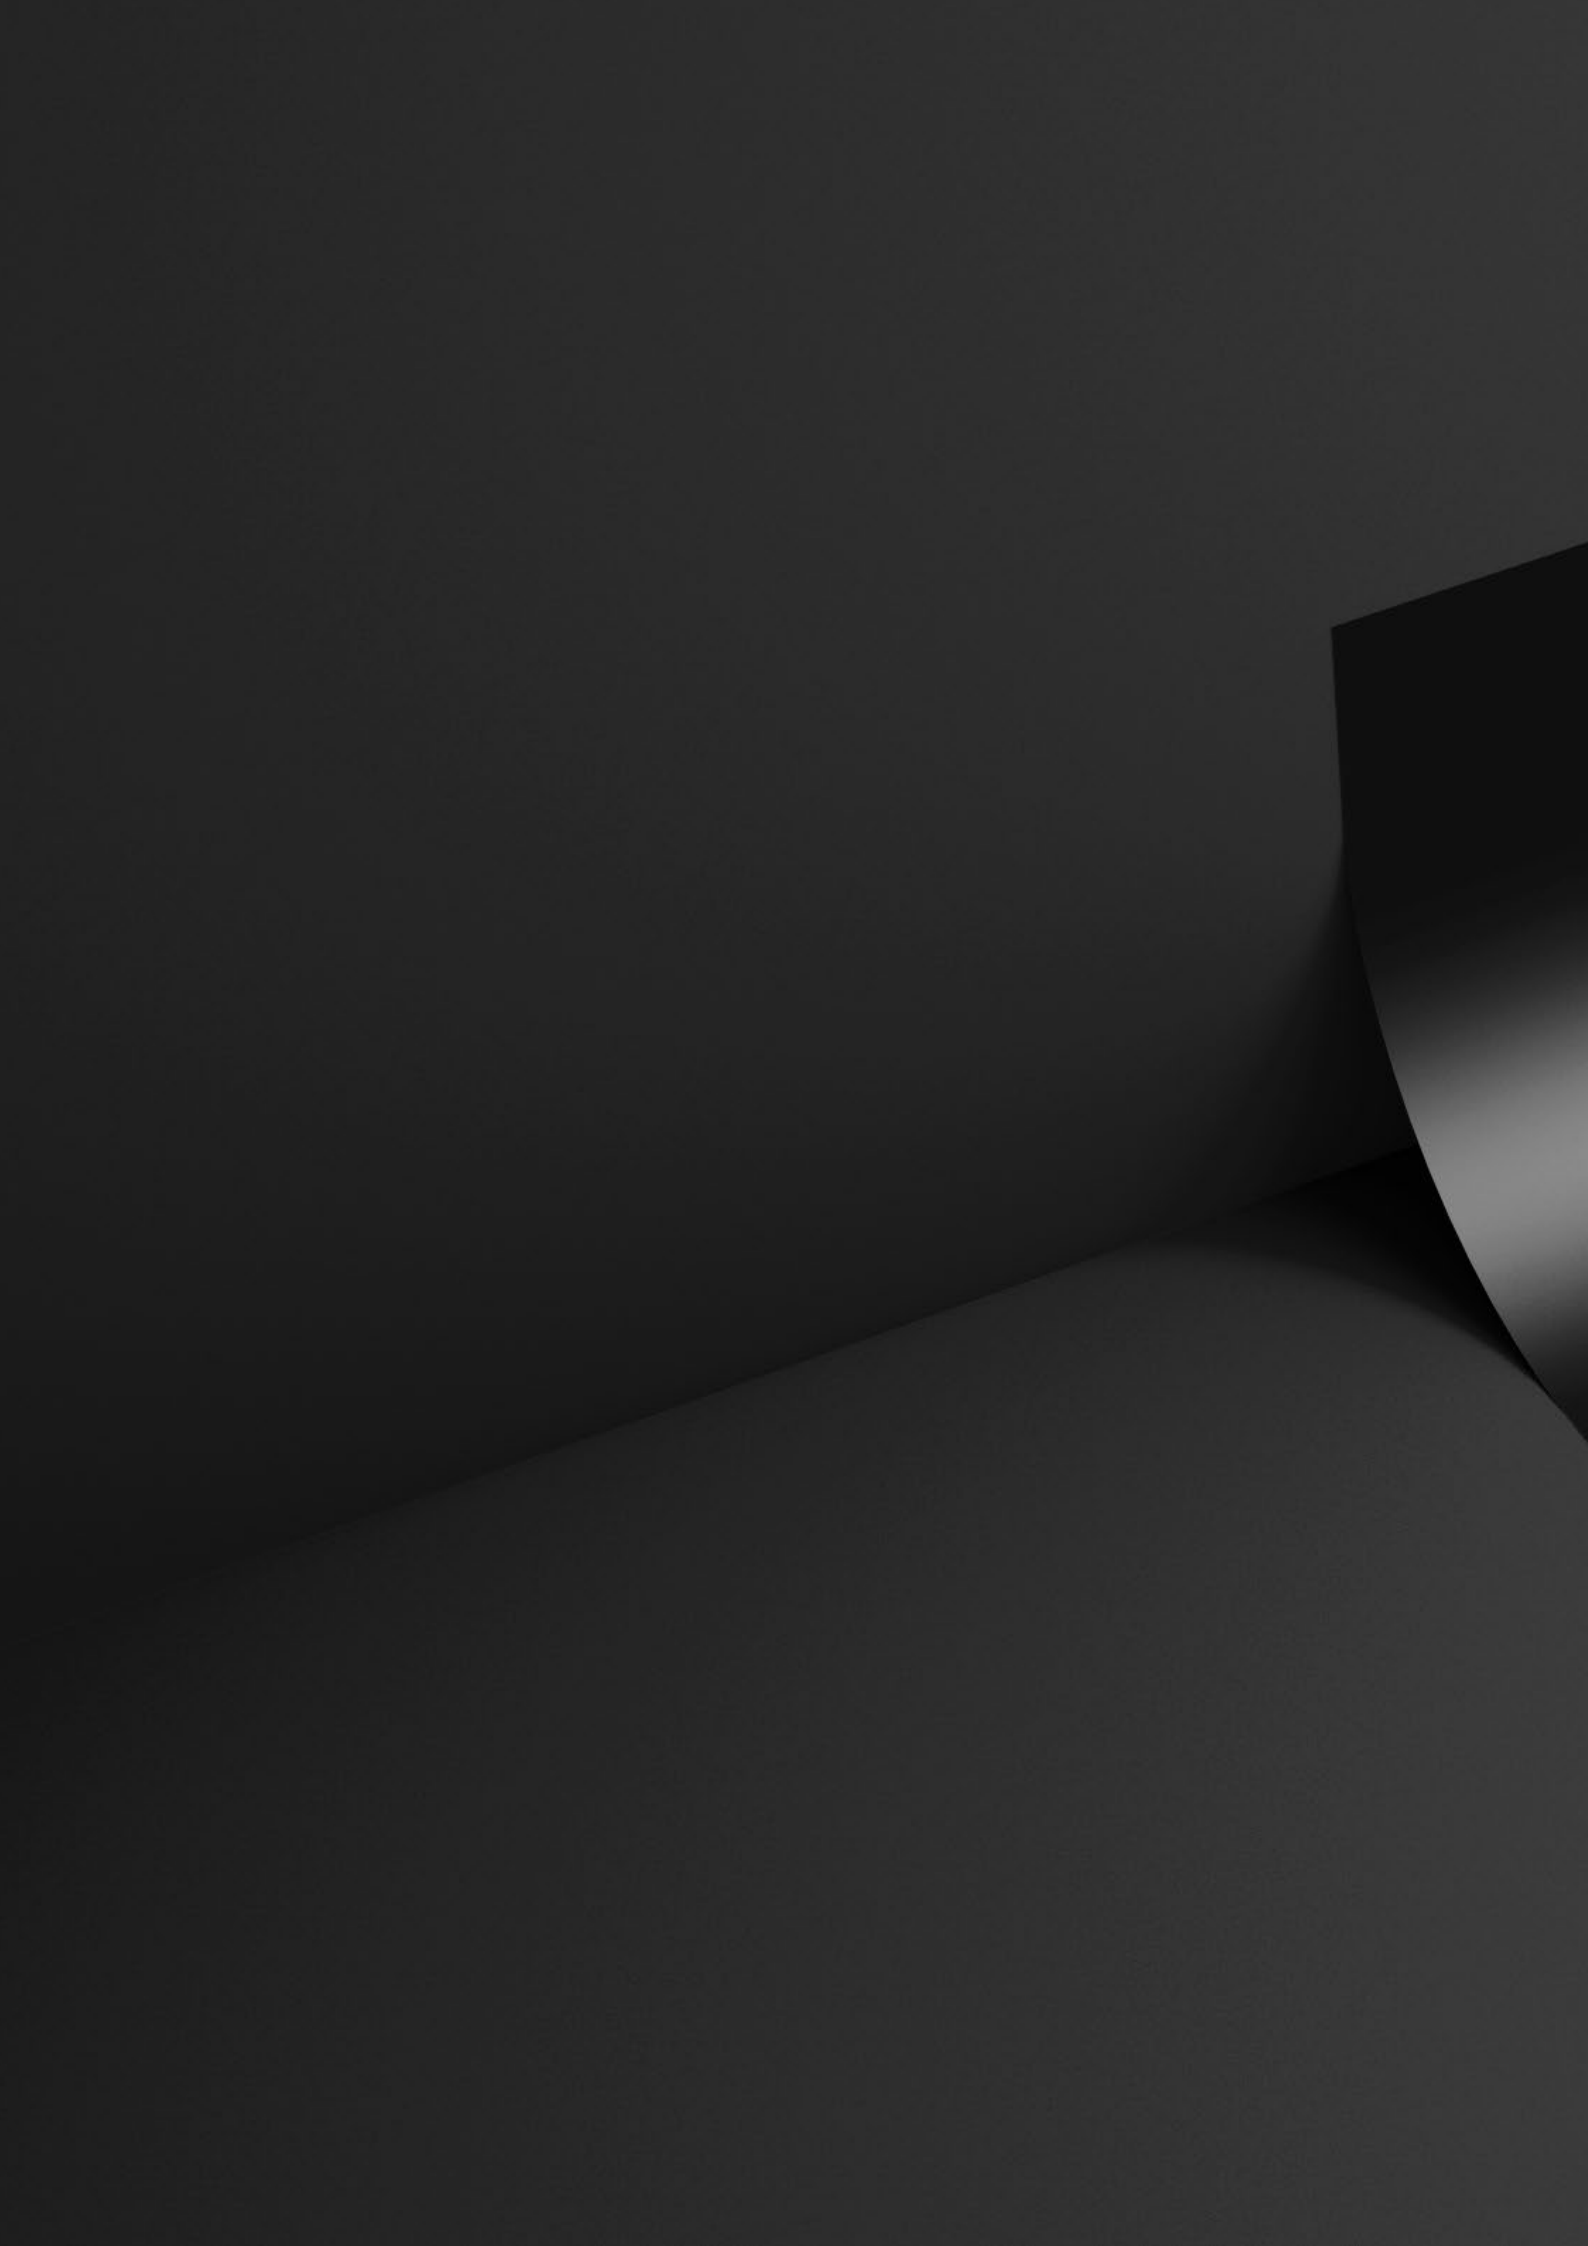

T —‾

like time management.
How long does the set-up of
your venue seats take your
employees? Is there eventually
a hidden considerable scope
for improvement?

U —

like update. For a monthly fee
system updates are carried out
automatically and your no.e
system is always up-to-date.

LEAD THE WORK FLOW REVOLUTI ON
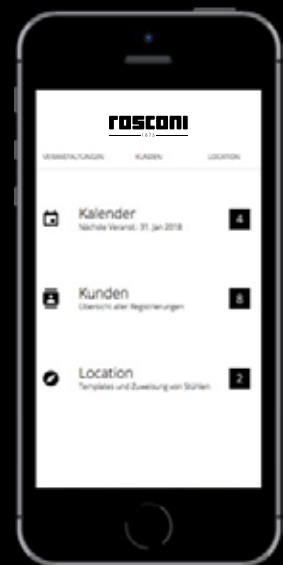

ROLES AND RIGHTS
OF USERS

OVERVIEW

A specific user role (administrator, activator) is assigned to each user. The administrator has full access to all functions.
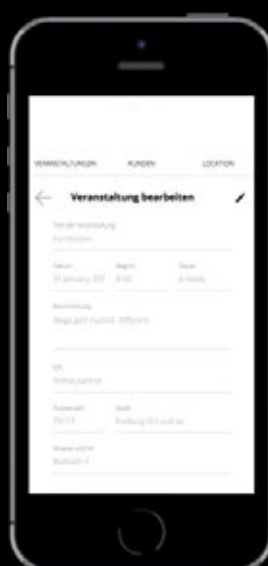

The activation ring:
Switch it on. Approach the display. Press its button and activate it quickly and easily.

EDITING
OF EVENTS

EDITING
OF SEATING PLANS

Via the button "edit room" the user is led to a sub-page. The configuration of rooms consists of several steps:

step 1
definition of chairs

step 2
import of all chair information via csv file

step 3
single edit of chairs and final check

step 4
transmission of data

ALL EVENTS
AT A GLANCE

Via frontend login (FE login) the user has access to his account. Here, all assigned room information which have been created in the backend is presented to him.

In his personal account, the customer is able to edit existing event information and to create new events. The following functions are available:

— Creating events
— Editing existing events
— Deleting events

EDITING
OF SEATING PLANS

At this point your predefined rows of chairs are displayed.

With a simple click on a specific chair row, a section is displayed where the user can define the status of individual chairs.
